DETAILED ACTION

Drawings

1. The drawings were received on January 10, 2005. These drawings are approved.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
3. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vizulis et al (US 6,602,309) in view of Tagalakakis et al (US 4,121,728).

Wherein the claims are drawn to a venting liner comprising three layers, the venting liner of Vizulis teaches the claimed liner except for a foamed intermediate layer.

Tagalakakis teaches a venting liner having a foamed intermediate layer.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute the aluminum layer of Vizulis with foamed layer as taught by Tagalakakis, since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. This modification would allow for compression of the liner between an associated container rim and an associated cap regardless of the pressure within the associated closed container.

Regarding the at least one channel extending from one edge to another edge of the first layer, Tagalakakis teaches the liner has at least one channel.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to further apply at least one channel extending from one edge to another edge of the first layer of Vizulis. Doing so provides an escape path for gas venting from an associated closed container.

Response to Arguments

4. Applicant's arguments with respect to claims 1-11 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703) 872-9306. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

7. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely

Art Unit: 3727

asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:
